

## LightSwitch Jeweller series

### Comfort and security in a touch

LightSwitch Jeweller is a smart light switch that combines a thoughtful user experience with the reliability of professional security systems. Its entire panel is sensitive to not only touch but also an approaching hand<sup>1</sup> at a distance of 15 mm. Thanks to the soft backlight, it is easy to find it in the dark. Also, the light switch can simulate presence and control curtains or blinds through automation scenarios.

## Designed for any interior

## Alternative to any switch

- Series includes 1-gang, 2-gang, 2-way, crossover, and dimmer switches
- Touch-sensitive switch panels are available in 8 colors
- Suitable for both horizontal and vertical installations

 <p><b>Big touch-sensitive panel</b></p>	<p><b>Up to 1,100 m</b> of communication distance<sup>2</sup> with an Ajax hub</p>	<p><b>LED backlight</b></p> 
 <p><b>Auto switch-off timer</b></p>	<p><b>Up to 5 devices in one frame</b></p> 	<p><b>Lighting control via a smartphone</b></p> 
 <p><b>Automation scenarios</b> to trigger appliances</p>	 <p><b>Overcurrent and temperature protection</b></p>	<p><b>Compatibility with light bulbs</b> from 5 to 600 W</p> 
<p><b>Protection for your curious little ones</b></p> 	<p><b>Contactless lighting control<sup>1</sup></b></p> 	<p><b>No need for a neutral wire</b></p> 

<sup>1</sup> LightSwitch (Dimmer) Jeweller does not support contactless control.

<sup>2</sup> In an open space.

## Automation for comfort and security

Thanks to automation scenarios, LightSwitch Jeweller can turn on/off the lights automatically by a security mode change or by schedule, control appliances, and more.

## Intuitive installation and connection

To add LightSwitch to the system, scan a QR code in Ajax apps and configure it in a few clicks. The smart switch can replace an old one without the need to change wiring or a mounting box. Touch-sensitive panels are replaceable.
