## WaterStop Jeweller

### Not a drop of problems

WaterStop Jeweller automatically shuts off water supply in 7 seconds after LeaksProtect Jeweller or a third-party water leak detector is triggered.

## Key features

**Automatic water shutoff:**  
by alarm of a leak detector, security mode change, and schedule

**Manual water shutoff:**  
at a press of a button or with a lever on the mount

**Up to 3 years**  
of operation on pre-installed batteries

**RuB valve included:**

1" (DN 25)

3/4" (DN 20)

1/2" (DN 15)

**Up to 1,100 m**

of communication range with Ajax hub or range extender<sup>1</sup>

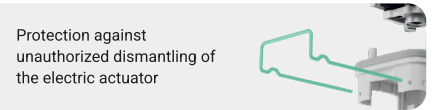

**external power supply as an option**

**Automatic stuck prevention**  
using a scenario

**Remote control and configuration**  
via Ajax apps

Protection against unauthorized dismantling of the electric actuator

**Pairing with the system via the QR code**

<sup>1</sup> In an open space

## Hassle-free installation

WaterStop Jeweller is ready to operate straight out of the box. Installation does not require tools or enclosure disassembling. The setup and testing takes seconds thanks to intuitive Ajax apps.

## Advanced automation for greater safety

WaterStop Jeweller is a part of the Ajax ecosystem. Thanks to scenarios, the valve can automatically shut water off upon a leak detector's alarm, while devices from MotionCam series or cameras can provide visual verification.
